

Cloudhash.eu

SimpleMining Image for Zero

1. Download our Custom SimpleMining Image:

RX 400/RX 500:

4GB & 8GB Cards:

<https://download.cloudhash.eu/zero/simplemining/rx400-rx500/>

Nvidia:

4GB & 8GB Cards:

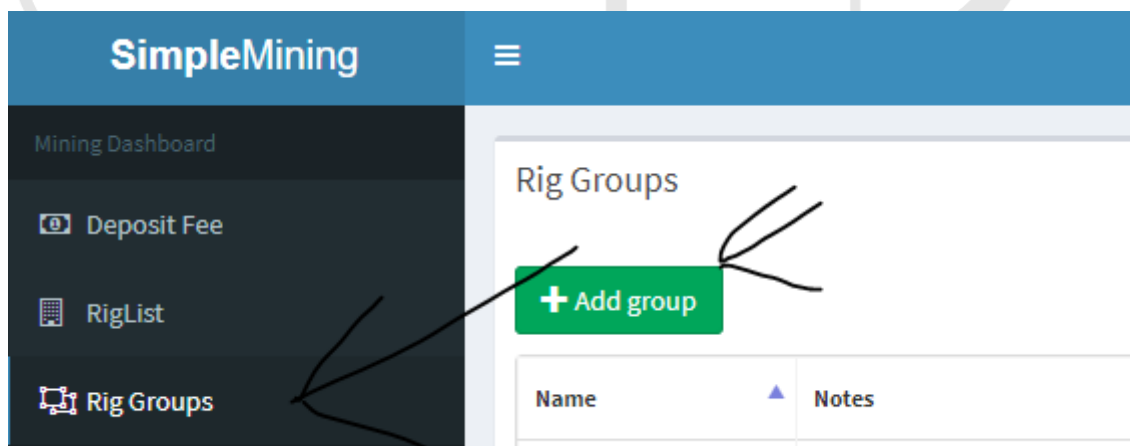

<https://download.cloudhash.eu/zero/simplemining/nvidia/>

R9 200 /R9 300:

4GB & 8GB Cards:

<https://download.cloudhash.eu/zero/simplemining/r9200-r9300/>

2. Unzip the image
3. Download Etcher (<https://etcher.io/>) and flash the img on your USB drive. Keep in mind that your USB drive must at least have min 8 GB.
4. After its successfully flashed you need to change the default SimpleMining E-Mail Address to your own (in the **config.txt**)
5. Create a new Rig Group
Go to simplemining.net, Add group

, choose the following miner: "optiminer-zec v1.7"

⊙	✓	✓	optiminer-zec v1.7	Equihash (zec,btg)	custom
Info: https://github.com/Optiminer/OptiminerZcash					
Default config: -s zec-eu.coinmine.pl:7007 -u tytanick.0 -p x					
-s zer.cloudhash.eu:7788 -u t1gkPaeC98mo3veSP5VUUFZCBYSt... -Jtowerminerino -p x					

Example Config:

-s zer.cloudhash.eu:7766 -u YourZeroAddress.YourRigName -p x

And give that group a custom name: for example: Cloudhash Zero Pool

Add group

Name (only letters and numbers)

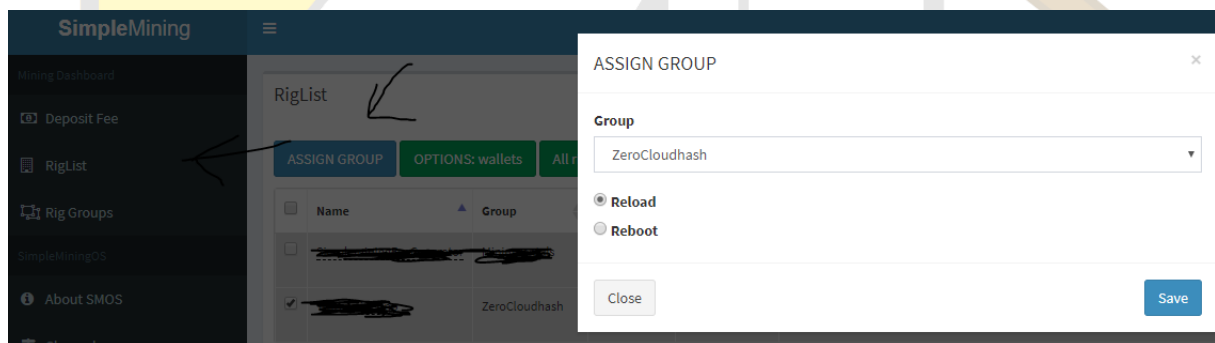

Cloudhash Zero Pool

Description

6. Assign the new created group to your miner

Go to "RigList"

Mark your Miner, click "Assign Group", Choose your Cloudhash Group

Happy mining.

We wish you best of luck, your Cloudhash Team
